PROJECTS

Moving parcels — *Apps*

As you drive to your destination, you can scan around you for available parcels that are moving in the same direction as your destination, pick and drop them off along your way as a driver, and you can place a parcel with the client app and it gets picked up and delivered. Beautiful design for both driver and client app. Built with react native and laravel backend.

Notifyza — Web App

Web app built with React, and Laravel with Bootstrap for sending SMSs in bulk and to contacts. Currently being used in schools in my hometown.

Loadshedding — *App*

A mobile application for load shedding information, includes national load shedding status, schedules, tweets and watchlist. Built with react native and react context for state management.

Movies and TV — *Web App*

Minimal, dark themed movies and tv site for finding your next movie to watch on Netflix. Build with react, react context for state management, Bootstrap and TMDB API.
